

OpenSHAPA: 1.01 Beta

128: Spreadsheet - Allow user to drag and drop columns to reset order.

When viewing the spreadsheet; users are now able to re-order columns by dragging and dropping the column header.

660: Need the ability to change the width of spreadsheet columns

When viewing the spreadsheet; users are now able to change the width of columns by dragging and dropping the border of the column header.

935: Make it so that you can click and drag tracks to set offset.

When viewing tracks; users are now able to drag tracks to set offsets and temporally align input data.

295: Contribute - How to write and share plugins

The OpenSHAPA wiki now has a document on how to write and share plugins.

997: Add section to wiki on design of new selection model

The OpenSHAPA wiki now has a document on the proposed design of the new selection model to be used within the spreadsheet.

937: Edit UISpec4J so that the file type can be changed in the FileChooserHandler

When writing UI-tests; testers are now able to change the desired file type when creating a UI-test.

656: Create UI test for BugzID:576 - display of warning dialog.

When running the UI-test suite; a test is now executed to ensure that a warning dialog is shown when the user attempts to create a new database with no name.

844: Create UI test for BugzID:743

When running the UI-test suite; a test is now executed to ensure that the user is provided with feedback indicating that the file has been saved (a '*' in the title bar).

709: Write UI tests for deleting cells

When running the UI-test suite; tests are now executed to check that cells can be deleted from the spreadsheet.

724: Vocab Editor - Apply/OK remain disabled after adding argument.

When editing coding vocabulary using the vocab editor; adding a new argument now enables the apply/OK/revert buttons.

740: Need test for case 713

When running the UI-test suite; a test is now executed to ensure that the last cell in a column is correctly removed from the spreadsheet on delete.

746: Need test for case 652

When running the UI-test suite; a test is now executed to ensure that predicate counter does not go back to 1 each time the vocab editor is re-opened.

753: Video resize should lock aspect ratio.

When viewing video; resizing the video window is now locked to the aspect ratio of the video.

788: Need test for case 697

When running the UI-test suite; a test is now executed to ensure that the new cell to left menu item creates cells in the column to the left of the original cell.

831: Jog increment for some videos defaults to 1 second rather than frame rate.

When using the data controller to navigate; jog now correctly jumps by an interval specified by the frame-rate (for all supported file types).

857: New Track does not appear if tracks are hidden

When viewing the data controller; adding new data now always creates a track, even when the track view is hidden.

862: Upgrade piwik to version 0.5

WEBSITE - Upgraded piwik to version 0.5

867: Change cursor when you mouse over red line in track view.

When viewing the data tracks; mousing over the current temporal position (red line) now changes the mouse cursor - indicating that it can be dragged around.

887: Data Viewer Controller set cell onset slash is wrong

When viewing the data controller; the correct slash is now used for the set cell onset button.

891: Set New Cell Offset changes offset of selected cell rather than last created cell

When creating cells with the data controller; set new cell offset now changes the offset of the last created cell, rather than the currently selected cell.

892: If another cell is highlighted, "create new cell and set onset" doesn't change previous cells offset

When creating cells with the data controller; create new cell and set onset now changes the offset of the last created cell, rather than the currently selected cell.

895: Opening file does not change database name on window until

save

When opening within OpenSHAPA; the title bar on the spreadsheet is now updated with the name of the file immediately after a user opens the project.

897: Apple+R shortcut key doesn't always work

When editing the spreadsheet; using apple+r should now always work to create cells to the right.

928: Videos in H264 don't display in OpenSHAPA although audio is heard.

When adding video data; videos encoded in H264 are now correctly displayed in OpenSHAPA.

976: Need to store new column order back to database when a user drags and drops.

When viewing the spreadsheet; re-ordering spreadsheet columns now saves the changes to the database so that they can be remembered and restored.

982: occasionally data gets lost when saving as a CSV file.

When saving within OpenSHAPA; saving database files to a locations that the user doesn't not have write permissions too will generate a warning message.

983: Upgrade Fogbugz to Fogbugz 7

WEBSITE - Fogbugz has been upgraded to 7.0

984: Setup permissions using fogbugz 7.

WEBSITE - Community members are now partitioned on group.

670: Create a test for Bug 585

When running the UI-test suite; a test is now executed to ensure that pasting negative integers functions correctly.

653: Write UI test for column deletion

When running the UI-test suite; tests are now executed to ensure that columns can be correctly removed from the spreadsheet.
