OpenSHAPA: 1.07 Beta

1806: Store plugin-specific button state in the project file

When saving and loading project; plugins are now able to store their own plugin-specific state in the project file.

1888: At bottom of column have a button/stub to add new cell

When viewing content in the spreadsheet; a new button is displayed at the bottom of a column to make it easier to add new cells.

1884: Single click for moving current temporal position

When viewing the track view; users are able to navigate to any point in the video by a single click on the time scale.

1885: Height and shading of time scale

When navigating data in the track view; the height and shading of the time scale has been tweaked to make it easier to navigate.

528: Write UI tests for selections in Timestamps

When running the suite of automated regression tests; a test is now performed to ensure that selections function correctly in timestamps.

620: Write a test for caret bouncing

When running the suite of automated regression tests; a test is now performed to ensure that the caret doesn't bounce when moving up and down the columns.

1703: MacSHAPA -> Open Project File

When moving data from MacSHAPA to OpenSHAPA; Opening project files created from MacSHAPA databases is now more reliable.

1909: Volume slider should close when it loses focus

When navigating data in the track viewer; using the volume slider on the mac no longer hides the OpenSHAPA menu at the top of the screen.

1934: Create test case for 1770 - recent script duplicates

When running the suite of automated regression tests; a test is now performed to ensure that running recent scripts no longer generates duplicates in the recent script list.

1935: When editing state of plugins - need to mark project as dirty

When using custom controls in the data controller; plugins are now able to store custom state when the project file is saved.

1944: TrackViewer Snap tests fail to move video window

When running the suite of automated regression tests; the snap tests now correctly move the video window and pass.

1945: Create new test for 'clear region of interest'

When running the suite of automated regression tests; a new test is now executed to ensure that the 'clear region of interest' works.

1950: Smooth adjustments of the track view time scale in the data controller

When navigating data in the track view; zooming and panning the time scale is now much smoother.

1958: Upgrade wordpress

SERVER - Upgraded wordpress to the latest and greatest.

1959: Upgrade piwik.

SERVER - Updated piwik to version 0.6.2.

1963: SSL

SERVER - Renewed the SSL certificate.

1034: Need to create UI test for Bug695

When running the suite of automated regression tests; a test is now performed to ensure that you can delete and create matrices through the vocab editor.

1927: Plugin API doesn't allow easy custom button icon manipulation

When creating plugins; it is now considerably easier for plugins to manipulate custom button icons.

1973: Region of interest

When navigating data in the track view; situations where the current temporal position can move outside the region of interest are now prevented.
